

A New CAUSE Canada Initiative! Carbon Offsets

On your behalf a gift was made to CAUSE Canada enabling us to offset carbon. Our organization has long been supporting environmental programs in both Central America and West Africa and over the past two decades we have planted more than 2 million trees in Guatemala and Honduras. In Sierra Leone, West Africa, we are recycling plastics and beginning the process of landfill gas utilization. In your name, we are minimizing and sequestering emissions of the greenhouse gases that exacerbate climate change.

From the people of the developing world who are most vulnerable to the effects of climate change, and all of us at CAUSE Canada, we say thank you!
